ABOUT ME

Passionate cross platform mobile application developer and loves to write expressive, elegant and maintainable code. As an experienced Flutter developer, I am proficient in Dart with state management solutions like GetX and BLOC, delivering cross-platform apps with high performance and intuitive UI/UX. In Android Development, I have expertise in Kotlin, and the MVVM architecture to build scalable and efficient mobile applications.

EDUCATION

SKILLS

- Flutter
- DART
- FireBase
- CodeMagic
- Kotlin
- GetX
- RiverPod
- Bloc

PROJECTS

American Sign Language (ASL) Learning App :

I'm building a cross-platform ASL learning app designed to help users learn and practice American Sign Language through interactive lessons, video demonstrations, and quizzes.

The app focuses on accessibility, user-friendly design, and performance optimization to support both hearing and deaf users in bridging communication gaps.
