Jyot Khant

Mobile App Developer · Flutter & Android

PROFILE

Passionate cross-platform mobile application developer who loves writing expressive, elegant and maintainable code. Experienced in Flutter and Dart with state management solutions like GetX and BLoC, delivering high-performance apps with intuitive UI/UX. On native Android, skilled in Kotlin and the MVVM architecture for building scalable, efficient applications.

EXPERIENCE

Mobile App Developer

Sep 2024 - Present

ESparkBiz Technologies

- Develop cross-platform mobile applications in Flutter for Android and iOS.
- Build and maintain high-performance apps using Dart with state management solutions (GetX, BLoC, Riverpod).
- Published apps on Google Play and the Apple App Store.

Mobile App Developer Intern

Jan 2024 - Aug 2024

ESparkBiz Technologies

- Learned to develop mobile applications from scratch for Android and iOS.
- Built projects in Kotlin using the MVVM architecture for better performance and maintainability.

PROJECTS

Pack-Tamam — Food Packaging Ordering App

Flutter · Cross-platform

- Developed and deployed the Android and iOS apps for a B2B platform where restaurants, cloud kitchens and cafés order food packaging with pan-India delivery.
- Built product browsing, quick quotes, real-time order tracking, easy reordering, GST invoices and multiple payment options (UPI, cards, net banking, wallets).
- Handled release builds and store submissions on Google Play and the Apple App Store.

American Sign Language (ASL) Learning App

Flutter · Cross-platform

- Building a cross-platform app that helps users learn and practice ASL through interactive lessons, video demonstrations and quizzes.
- Focused on accessibility, user-friendly design and performance to help hearing and deaf users bridge communication gaps.
